PERSONAL SUMMARY

Full-stack developer and AI/ML enthusiast pursuing a B.Tech in Information Technology, currently working as an AI/ML Intern building and evaluating deep learning models. Skilled in the MERN stack and Python-based ML/DL workflows, with hands-on experience delivering real-time computer vision systems, RAG-based AI assistants, and full-stack web applications for both academic and freelance clients. Strong foundation in data structures, model development, and end-to-end product delivery, with a track record of hackathon finals and competitive programming placements.

EDUCATION

Institute of Information and Communication Technology (IICT), MGM University

2023 – 2027

Bachelor of Technology in Information Technology — CGPA: 8.45

EXPERIENCE

AI/ML Intern — SURE Trust Remote

Nov 2025 – Present

- Developed and trained AI/ML models using Python, Pandas, NumPy, Scikit-learn, TensorFlow, PyTorch, and Seaborn.
- Worked on data preprocessing, model evaluation, and deep learning techniques including ANN, CNN, RNN, and RAG while collaborating using Git/GitHub.

SKILLS

Programming Languages: Java, Python, JavaScript, SQL

Development (Frontend & Backend): React.js, HTML, CSS, Node.js, Express.js, REST APIs, React Router, Axios, Mongoose

Databases: MongoDB, MySQL

Developer Tools: Git, GitHub, Docker, Postman, Jenkins, GitHub Actions, CI/CD

Machine Learning, Deep Learning & Data Analytics: Supervised Learning, Classification, Regression, Model Evaluation, ANN, CNN, Transfer Learning, Scikit-learn, TensorFlow, PyTorch, OpenCV, NumPy, Pandas, Matplotlib, Seaborn

Natural Language Processing: Semantic Search, Tokenization, Text Preprocessing, Ollama

PROJECTS

Accident Detection System

[GitHub](#)

- Built a real-time accident detection system using YOLOv8 with ByteTrack.
- Integrated Geolocation, MDP (Markov Decision Process), MLP (Multi-Layer Perceptron), and LSTM for accident prediction and a live monitoring dashboard.

Zero UI Emergency Detection System

[GitHub](#)

- Developed a sensor-based emergency detection system using Accelerometer, Gyro Sensor, and GPS data from smartphones.
- Built a MERN stack dashboard to automate emergency alerts without requiring any user interaction.

Karma E-Commerce Platform

[GitHub](#)

- Built a full-stack e-commerce platform using MongoDB, Express.js, React.js, and Node.js with REST APIs.
- Implemented product management, shopping cart, and role-based access control using Mongoose and Axios.

DocuMind AI

[GitHub](#)

- Developed an AI document assistant using local LLMs with RAG (Retrieval-Augmented Generation), embeddings, and model fine-tuning.
- Implemented semantic search using Ollama for context-aware PDF question answering.

Multi-Firm Management System

[GitHub](#)

- Built a multi-tenant management platform for Patil Petroleum and Namrata Constructions, with isolated data, role-based access, staff, attendance, and operations.
- Built using the MERN stack (MongoDB, Express.js, React.js, Node.js) with REST APIs, delivering a custom solution from requirements gathering through deployment.

CERTIFICATIONS

- Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate – Oracle
- Artificial Intelligence Workshop – Techfest, IIT Bombay in collaboration with GUVI-HCL
- Prompt Engineering & Programming with OpenAI

ACHIEVEMENTS

- Finalist, Zentrix'26 National Level Smart City AI Hackathon
- Finalist, Zero UI Challenge, Cummins College of Engineering
- 3rd Rank, IEEE C'Quest Programming Competition
- Google Solution Challenge Participant
